# finishing touches

Handy finds for yards great and small

**Contain Yourself** From the Cubico Color collection, these Ledfuse planters feature a self-watering sub-irrigation system that keeps root systems moist and prevents waterlogging. Visit [ledfuse.com](http://ledfuse.com) to see how it works, or call 877-632-4892.

**Make Your Bed** New from Art of the Garden, the M Brace is a complete bed kit that easily adjusts to your space and sets up with no tools required! Simply slide boards of your choice into their corner brackets, fill with soil and plant. Brackets come in decorative designs, too, including a carrot that's perfect for framing a little veggie patch. **Border Line** The Stone Wall Border™ offers the beauty of stone without the expense. Crafted from durable plastic, the kit's six-piece interlocking base holds soil in place, while six top pieces snap-lock into place to anchor the foundation. **Water Works** The Ames Water Genie (also known as The Bottomless Watering Can) looks like a conventional can but actually houses a 40' integrated hose that rewinds automatically for easy storage, plus an adjustable spray nozzle. Lighter than a full 2-gallon can, it offers endless go-anywhere convenience. [homedepot.com](http://homedepot.com)
